Germany,

1. On 14 January 1947, 3,000 naval recruits of classes 1929-1931, drafted in 1946, arrived in Rostock from the USSR. As of 1 February, Rostock had approximately 6,000 haval and 2,000 ground troops.

25X1A

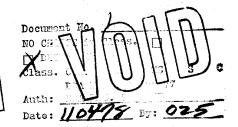

PLANS

FEP

- 2. During the period of 14 January to 1 February, there were approximately sixty mine sweepers lying in Rostock harbor. These were being used for training purposes.
- 3. The Neptumwerft is overhauling and repairing twenty rotorboats and also equipping these craft with ultra-short-wave remote-control apparatus. The boats are tested near Warnenunde.
- 4. The Neptunwerft is also equipping an unspecified number of motor torpedo-boats with heavy machine guns. Seven such guns, mounted side by side, fire automatically every ten meters (sic). These guns were designed at the Borsig-Werke, Berlin, in 1940, and material and drawings were later sent to the Borsig subsidiary in Breslau.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 13 October 1973 from the Director of Central Intelligence to the Archivist of the United States.
